

GPUs & AI Servers

AI hardware through primary and secondary channels — including platforms OEMs no longer supply. The difference is the clock: equipment lands on site in weeks, not the months an OEM allocation queue demands.

WHAT WE TRADE

GPU	GPUs & Accelerators	Current and prior-generation, incl. end-of-sale platforms.
SRV	AI Servers	Complete configurations by manufacturer — Supermicro, Gigabyte, Dell — to your spec.
NET	Networking, Racks, Power	Switches, PDUs, distribution — one order, one delivery.
MOD	Modular Containers	Compute-ready enclosures for energised sites.
RTB	Trade-in / Buyback	Fleet rotations in a single documented transaction.

HOW THE DESK WORKS

01	Spec & Quote	Platform, quantity, timeline. Pricing back within one business day.
02	Source	Primary allocation where available; secondary network where faster.
03	Verify	Serials, provenance, and condition documented, with grades in the deal file. Escrow available.
04	Ship	Logistics, customs, and delivery to site, worldwide.

TRACK RECORD

UNITS TRADED 500,000+	HASHRATE PLACED 60 EH/s	LOAD DEPLOYED 1.65 GW	TRADING SINCE 2020

IN PLAIN TERMS

We are a distributor. The equipment we supply carries its manufacturer's name, not ours; we do not engineer or certify it. Our value is the supplier network, the verification standard, and logistics that put equipment on site months before the standard channel.
